Yomly **automates HR & Payroll processes** for Elite Horizon, cutting the time spent on end of the month procedures by 50%

Industry: Charcoal Supplier
Client Since: 2021
Champions: Aadil Datta, General Manager
Locations: Dubai, United Arab Emirates
Employees: 30
Website: https://www.elite-horizon.com/

Challenge

Established with one goal in mind, Elite Horizon set out to increase the standards expected from a supplier. The company's impressive performance in the Middle East resulted in rapid growth, seeing it grow from three employees to over 30 in less than 30 months. This exciting expansion pushed Elite Horizon to search for an HR and payroll solution to support the needs of their growing team.

The team had been working off Excel spreadsheets, with a system incapable of handling advances and loans - as well as many other essential HR & Payroll processes. Elite Horizon approached Yomly looking for a user-friendly system and a one-stop-shop for handling everything relating to employees; from documents to payslips. "A big issue we were facing was organising employee advances and loans," explains Aadil Datta, General Manager. "The Yomly system handles payroll seamlessly, automatically adding the data to payslips and simplifying the process, so nobody is left in the dark."

"Without a doubt, the Yomly system has saved us both time and money," says Aadil. "We no longer spend any time calculating leave, flights or advances. We don't get requests for letters or payslips from employees and the system has cut the time spent on end-of-the-month procedures down by at least 50%."

Solution

"From the first time we saw the Yomly platform, we were so impressed with the fantastic user-friendly design on the app and the web portal. We liked the functionality and the integrations that the platform offered. We are planning to integrate the system with BioTime which will save a huge amount of manual work" says General Manager, Aadil Datta.

"We have been so impressed with the capabilities of the platform since its implementation. We had a training day with a very helpful member of Yomly, who took the time to explain every detail of the platform, ensuring that we were able to get the most out of it. Thanks to the combination of onsite training, email support and our dedicated Customer Success Manager, we have a point of contact if we need anything to do with the platform, but it is so easy to use, that we haven't needed much additional training!"

Aadil commented that "since its implementation, the Yomly platform has increased transparency with employees and their salaries, helped centralise documents and allowed our HR and accounts teams to monitor document validity. The platform has streamlined the flow of allowances and benefits, providing a centralised place for employees to view their benefits. Without a doubt, the Yomly system has saved us both time and money," says Aadil. "We no longer spend any time calculating leave, flights or advances. We don't get requests for letters or payslips from employees and the system has cut the time spent on end-of-the-month procedures down by at least 50%."
