

BetterHomes chooses Yomly to provide a cloud-based, user friendly and customisable HR & Payroll solution.

Industry: Real Estate

Client Since: 2018

Interviewed: Brendon Gonsalves, Senior HR Executive

Locations: Dubai, United Arab Emirates

Employees: 400+

Website: <https://www.bhomes.com>

Challenge

Established in 1986, BetterHomes currently has offices and franchises across the region, connecting people locally and globally with its 400+ plus team of certified consultants and staff, supplemented by an extensive property database, magazine and interactive website.

Offering easier ways to discover lucrative real estate opportunities, the company has grown to become one of the Region's most recognised and respected brands, specialising in residential and commercial property, property management, short-term rentals and off plan.

"The previous software company we used lacked support and had many system errors, it was complicated and had complex reporting tools" Brendon Gonsalves, Senior HR Executive at BetterHomes, explains. "Our top priority was to launch an employee self-service portal that has to be user friendly, can be accessed via mobile application, as well as include customisable reporting tools." When asked what made Yomly stand out compared to other cloud-based HR software in the market, Brendon explained "Yomly is very user friendly, offers great flexibility for customisation based on our requirements and is cloud-based which was exactly what we were looking for."

"In terms of ROI, we have already seen an increase in productivity given it's a great technology platform for our employees to use"

Solution

In late 2018, BetterHomes selected Yomly to provide a cloud-based, user-friendly and customisable HR & Payroll Solution. "With Yomly we are able to add multiple companies and groups into the system. Our staff can view/download their own pay slips and documents directly from the portal, as well as check their annual leave balance via the calendar and apply for leave directly. In terms of ROI, we have already seen an increase in productivity given it's a great technology platform for our employees to use" says Brendon.

"Overall, our team have been most impressed with the platform's layout, display, functionality and clearly defined tabs making it simple to navigate and reducing the time it takes to do our usual tasks. We are already in the process of adding new companies to Yomly and we are looking forward to utilising the new functionality that is due to be released" concludes Brendon Gonsalves, Senior HR Executive at BetterHomes.
